# ALEKSANDRA SEREDKINA

## Application Security Engineer

### ABOUT ME

AppSec Specialist with 4 years in software engineering, specializing in web/API security, vulnerability analysis, and actionable remediation guidance.

### CORE SKILLS

- Frontend, Backend, DevOps, JavaScript, Python, TypeScript, PostgreSQL
- Web / API security: OWASP Top 10, IDOR/BOLA, XSS, SQL injection, CSRF, SSRF, JWT and business logic.
- DevSecOps: GitLab CI/CD, SAST, Docker, Linux/Windows Hardening, Nginx, Bash and PowerShell.
- Information security audit and assurance

### ACHIEVEMENTS

- Designed and developed user interfaces for six major industrial enterprises.
- Proud of my broad full-stack technology stack, combining frontend excellence with backend and DevOps expertise
- Delivered 132 features that led to a 48% reduction in logistics time and significantly improved process automation.

### WORK EXPERIENCE

**Senior Frontend Developer I Security Engineer**

*DvG-Project / June 2022 – Present*

A software development company specializing in MES systems for process automation, equipment downtime optimization, and Pick-to-Light logistics for industrial enterprises. I am responsible for all frontend development across projects.

- ➤ Architected and integrated DevSecOps pipelines in self-hosted GitLab CI/CD with SAST (Semgrep), SCA, and Secret Detection, achieving 100% security scanning coverage across production repositories and blocking 15+ critical secret leaks pre-commit.
- ➤ Secured enterprise infrastructure against DoS/DDoS attacks by implementing rate-limiting, security headers, and Nginx/UFW configuration, achieving 100% server uptime
- ➤ Consulted a team of 10 developers on web security, conducting security design reviews and helping implement secure coding practices
- ➤ Implemented Multi-Factor Authentication (2FA), SSH key policies, and conducted Access Group Audits, reducing excessive privileges by 65%
- ➤ Analyzed business processes and designed IT product interfaces for six major companies in paint manufacturing, pharmaceuticals, food production, retail, and logistics.
- ➤ Conducted security audits and code reviews, identifying and remediating critical web/API vulnerabilities including IDOR, Broken Authentication, XSS, and CSRF prior to production releasesDevSecOps
- ➤ Initiated WebSocket integration for real-time updates in Pick-to-Light systems, minimizing data processing delays.
- ➤ Designed and developed an interactive warehouse map with rack visualization, storage zones, shipping buffers, and a shortest-route algorithm—reducing planning time by 90%.

### EDUCATION

**Belgorod College of Mechanical Engineering**

*Maintenance and Repair of Electrical and Electromechanical Equipment*

**Additional Education**

*Certified in Jr Penetration Tester Learning Path and Pre Security Learning Path, Continuously developing expertise in Frontend Development, Information Security, Next.js, NestJS, Node.js, DevOps, React.*

*English– B1*
